CIDOC 2017, Tbilisi

The Getty Vocabularies

Discover, link, access, retrieve, research, catalog, index

Who are our users? How do they access?

- *Museums, archives, universities, libraries, governments*
- *Incorporated into collection management systems locally, or into products like TMS (The Museum System by Gallery Systems)*
- *Incorporated into local thesauri, for smaller collections, for those who don't need the entire data set*
- *Online research tool, to populate catalog entries with Getty IDs*
- *Linked within online databases (standards: VIAF, Wikipedia)*

- Why Vocabularies?
- There are many challenges and barriers to providing access to cultural heritage information
- The multilinguality and semantic links of the Getty vocabularies may aid breaking down some of these barriers
- *E.g., different cultures may refer to the style of very similar vases by different terms*

Europeana enriches its data with the AAT

By Valentine Charles and Cécile Devarenne, Europeana Foundation

The Getty Research Institute announced last March the [release of their Art and Architecture Thesaurus \(AAT\)](#) as Linked Open Data. This release opened many opportunities for Europeana.

AAT is a rich, structured and multilingual vocabulary including terms, descriptions, and other information for generic concepts related to art, architecture, other types of cultural heritage and conservation.

AAT has always been an important resource for Europeana's data providers, especially museums. However, until now Europeana was not in the position to exploit it: firstly because the vocabulary was not openly available, secondly because Europeana didn't have the technical means to exploit it.

The implementation of the Europeana Data Model (EDM) was the first step towards the re-use of widespread vocabularies such as AAT. EDM embraces the principles of the Semantic Web and therefore can be seamlessly integrated with a network of vocabularies at a semantic level. EDM gives support for contextual resources — the so-called 'semantic layer', including concepts from 'value vocabularies' like thesauri, authority lists, classifications, either coming from the network of Europeana's providers or from third-party data sources. Since EDM is geared towards re-using existing semantic resources, the publication of AAT as Linked Open Data was an opportunity to seize.

International Translation Projects

AAT: Chile, Germany, Taiwan and Mainland China translations. Future agreements for substantial amounts of terms in Polish, Hebrew, and Portuguese. We hope for Russian, Arabic, Japanese, and of course Georgian contributions as well.

Terms are loaded in batches. Translators usually progress through a single hierarchy, and concentrate on their most needed terms

New terms with no English equivalent are added

Translators are sourced and credited

ID: 300053368

 **impasto** (<painting techniques by application method or circumstances and Techniques (hierarchy name))

Note: Application of paint in thick, opaque masses, usually with a well-load

Terms:

impasto (**preferred**,C,U,English-P,D,U,U)
(Spanish,AD,U,U)
(Dutch-P,D,U,U)

impasto painting (C,U,English,UF,U,U)

loaded brush painting (C,U,English,UF,U,U)

pastose painting (C,U,English,UF,U,U)

厚塗 (C,U,Chinese (traditional)-P,D,U,U)

厚塗法 (C,U,Chinese (traditional),UF,U,U)

hòu tú (C,U,Chinese (transliterated Hanyu Pinyin)-P,UF,U,U)

hou tu (C,U,Chinese (transliterated Pinyin without tones)-P,UF,U,U)

hou t'u (C,U,Chinese (transliterated Wade-Giles)-P,UF,U,U)

Pastos (impasto) (C,U,German-P,D,U,U)

pintura al impasto (C,U,Spanish-P,D,U,U)

Contributions

- Easy as X-M-L...or even Excel!
- Contributors of bulk data will sign a letter of agreement
- Contributions must meet the following criteria:
 - must be submitted by an authorized contributor
 - must be within scope of the vocabulary
 - must include the minimum information
 - must be submitted in the prescribed format
- By contributing data to the vocabulary, the contributor agrees to its contributed data becoming a permanent part of the vocabulary, which is licensed in various formats and made available as Linked Open Data

Title	The Milkmaid Vermeer, Johannes Het melkmeisje
Description	A maidservant pours milk, entirely absorbed in her work. Except for the stream of milk, everything else is still. Vermeer took this simple everyday activity and made it the subject of an impressive painting – the woman stands like a statue in the brightly lit room. Vermeer also had an eye for how light by means of hundreds of colourful dots plays over the surface of objects.
People	Creator: Vermeer, Johannes
Classifications	Type: easel paintings (paintings by form) Subject: kitchen-maid, kitchen servant
Properties	Size: height 45,5 CM , width 41 CM Format: canvas (textile material) Language: nl

easel paintings (paintings by form) (<paintings by form>, paintings (visual works), ... Visual and Verbal Communication (hierarchy name))

Note: Paintings executed on an easel or other portable device, having either canvas or panel supports; generally restricted to those painted from the 16th century forward. The term implies not only physical aspects of creation, but also inherent concepts associated with the increased secular use of art from the 16th century and with the identification of paintings as objects of worth in their own right.

Terms:

- easel paintings (paintings by form) (preferred,C,U,English-P,D,U,PN)
- easel painting (painting by form) (C,U,English,AD,U,SN)
- paintings, easel (paintings by form) (C,U,English,UF,U,N)
- easel-paintings (paintings by form) (C,U,English,UF,U,N)
- easel pictures (C,U,English,UF,U,N)
- easel-pictures (C,U,English,UF,U,N)
- easel-pieces (C,U,English,UF,U,N)
- schilderijen (C,U,Dutch-P,D,U,U)
- schilderij (C,U,Dutch,AD,U,U)
- ezelschilderijen (C,U,Dutch,UF,U,U)
- schilderstuk (C,U,Dutch,UF,U,U)
- schilderstukken (C,U,Dutch,UF,U,U)
- doeken (C,U,Dutch,UF,U,U)
- peintures de chevalet (C,U,French-P,D,U,PN)
- peinture de chevalet (C,U,French,AD,U,SN)
- Staffeleibilder (C,U,German,D,PN)
- Staffeleibild (C,U,German-P,AD,SN)
- pinturas de caballete (C,U,Spanish-P,D,U,PN)
- pintura de caballete (C,U,Spanish,AD,U,SN)
- cuadro (pintura) (C,U,Spanish,UF,U,SN)
- cuadro portátil (C,U,Spanish,UF,U,SN)
- lienzo (pintura de caballete) (C,U,Spanish,UF,U,SN)
- tela (pintura de caballete) (C,U,Spanish,UF,U,SN)

AAT used as “Hub” vocabulary in ARIADNE cross search for archaeological resources (<http://ariadne-portal.dcu.gr/>)

ID: 300024663

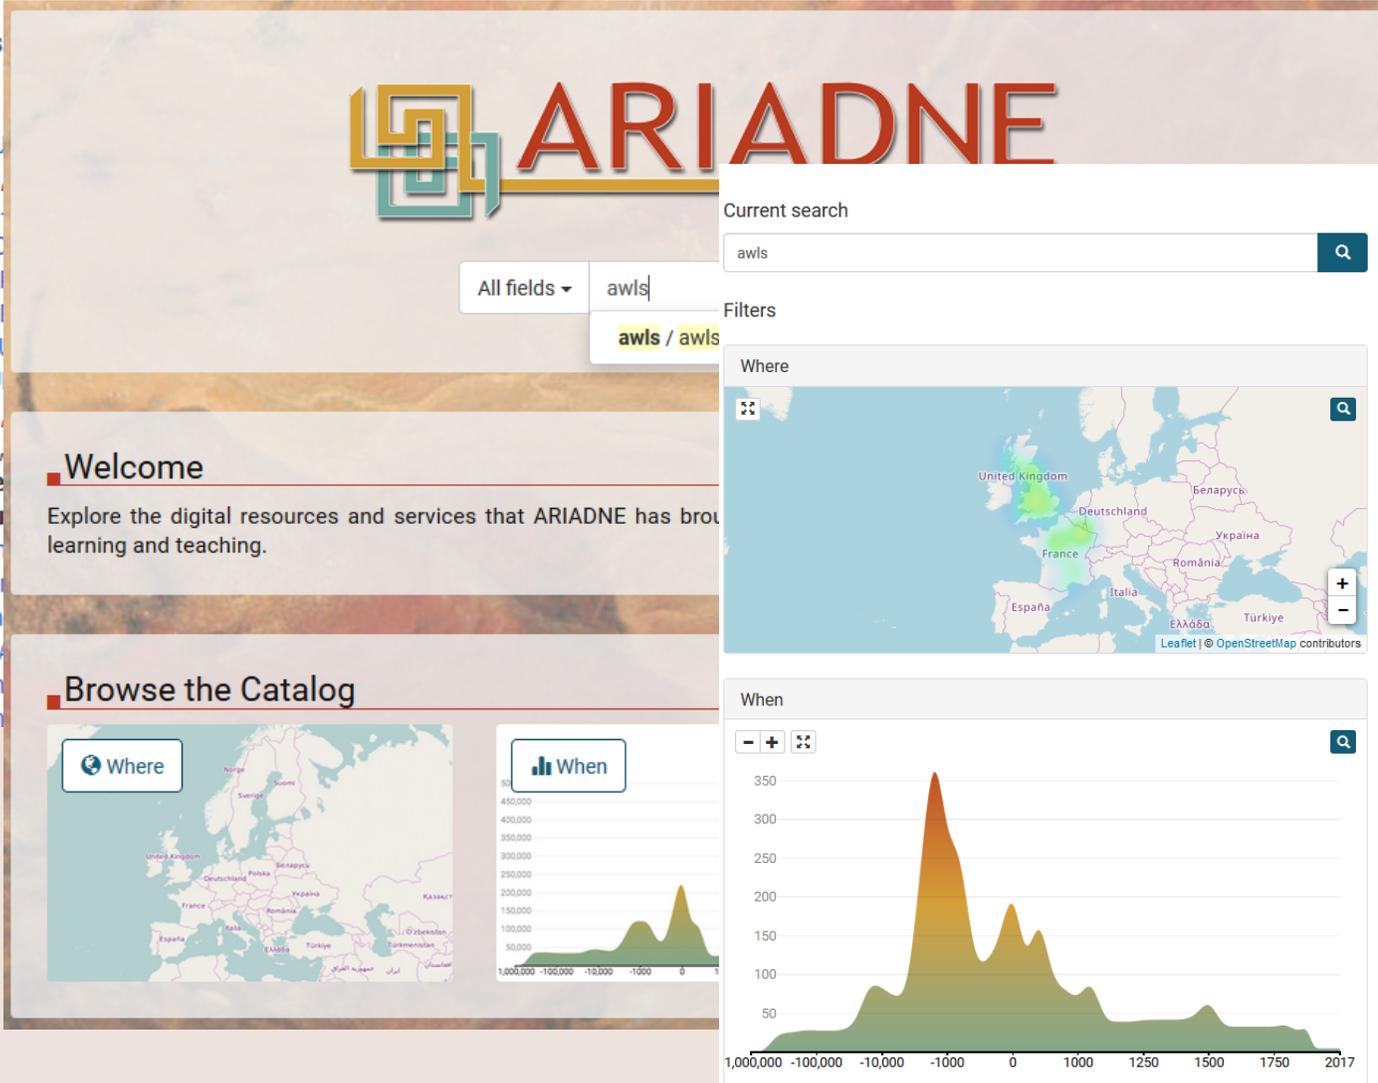

Record Type: concept

 awls (piercing tools, <equipment by process>, ... Furnishings and Equipment (hierarchy name))

Note: Sharp metal points

Terms:

awls (preferred, C,U,
awl (C,U,English,AD,
priemen (C,U,Dutch,
priem (C,U,Dutch,AD,
alènes (C,U,French-
alène (C,U,French,Al
alènes (C,U,French,
alène (C,U,French,U
poinçons (awls) (C,
poinçon (awl) (C,U,
Ahlen (Lochwerkze
Ahle (Lochwerkzeu
Stechahle (C,U,Germ
Stechahlen (C,U,Ge
leznas (C,U,Spanish
lezna (C,U,Spanish,
alezna (C,U,Spanish

∨ About the Creator

From Gilcrease Museum:

Creator: [Albert Bierstadt](#)

Role(s): Artist

From Getty's Union List of Artist Names:

Names (all): Bierstadt, Albert

Birth Date: 1830

Death Date: 1902

Nationalities: American (North American)

Roles: American painter, 1830-1902

Gender: male

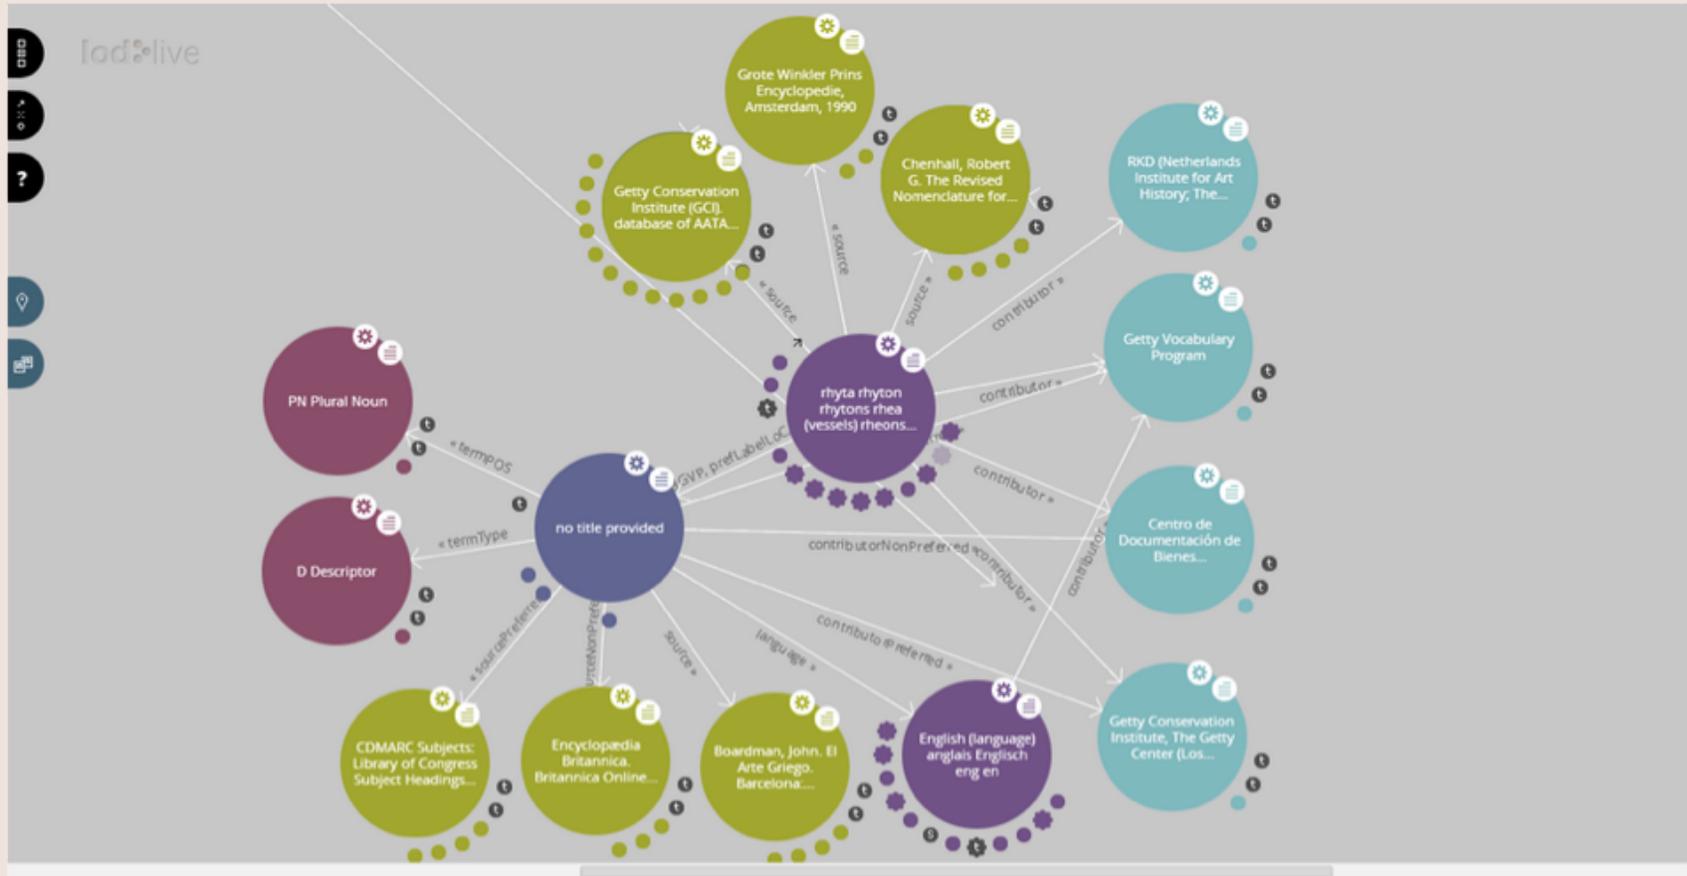

Note: Bierstadt was one of the most important landscape painters of the American West, producing large, romantic canvases of the Rocky Mountains, the Yosemite Valley, and the Native American tribes of the West. He also owned a successful photography business with his brothers, Charles and Edward, that operated in New York City from 1860 to 1866.

Related People:

- Bierstadt, Charles, partner of - person American photographer, 1819-1903
- Bierstadt, Edward, partner of - person American photographer, 1824 - ca. 1907
- Bierstadt, Charles, sibling of - person American photographer, 1819-1903
- Bierstadt, Edward, sibling of - person American photographer, 1824 - ca. 1907

Teacher-student relationship among French artists born between 1800 and 1950.

Foreword

This is a small test to explain the process following an emailed request after this [tweet](#) by Antoine Courtin ([@seeksanusername](#))

Legend:

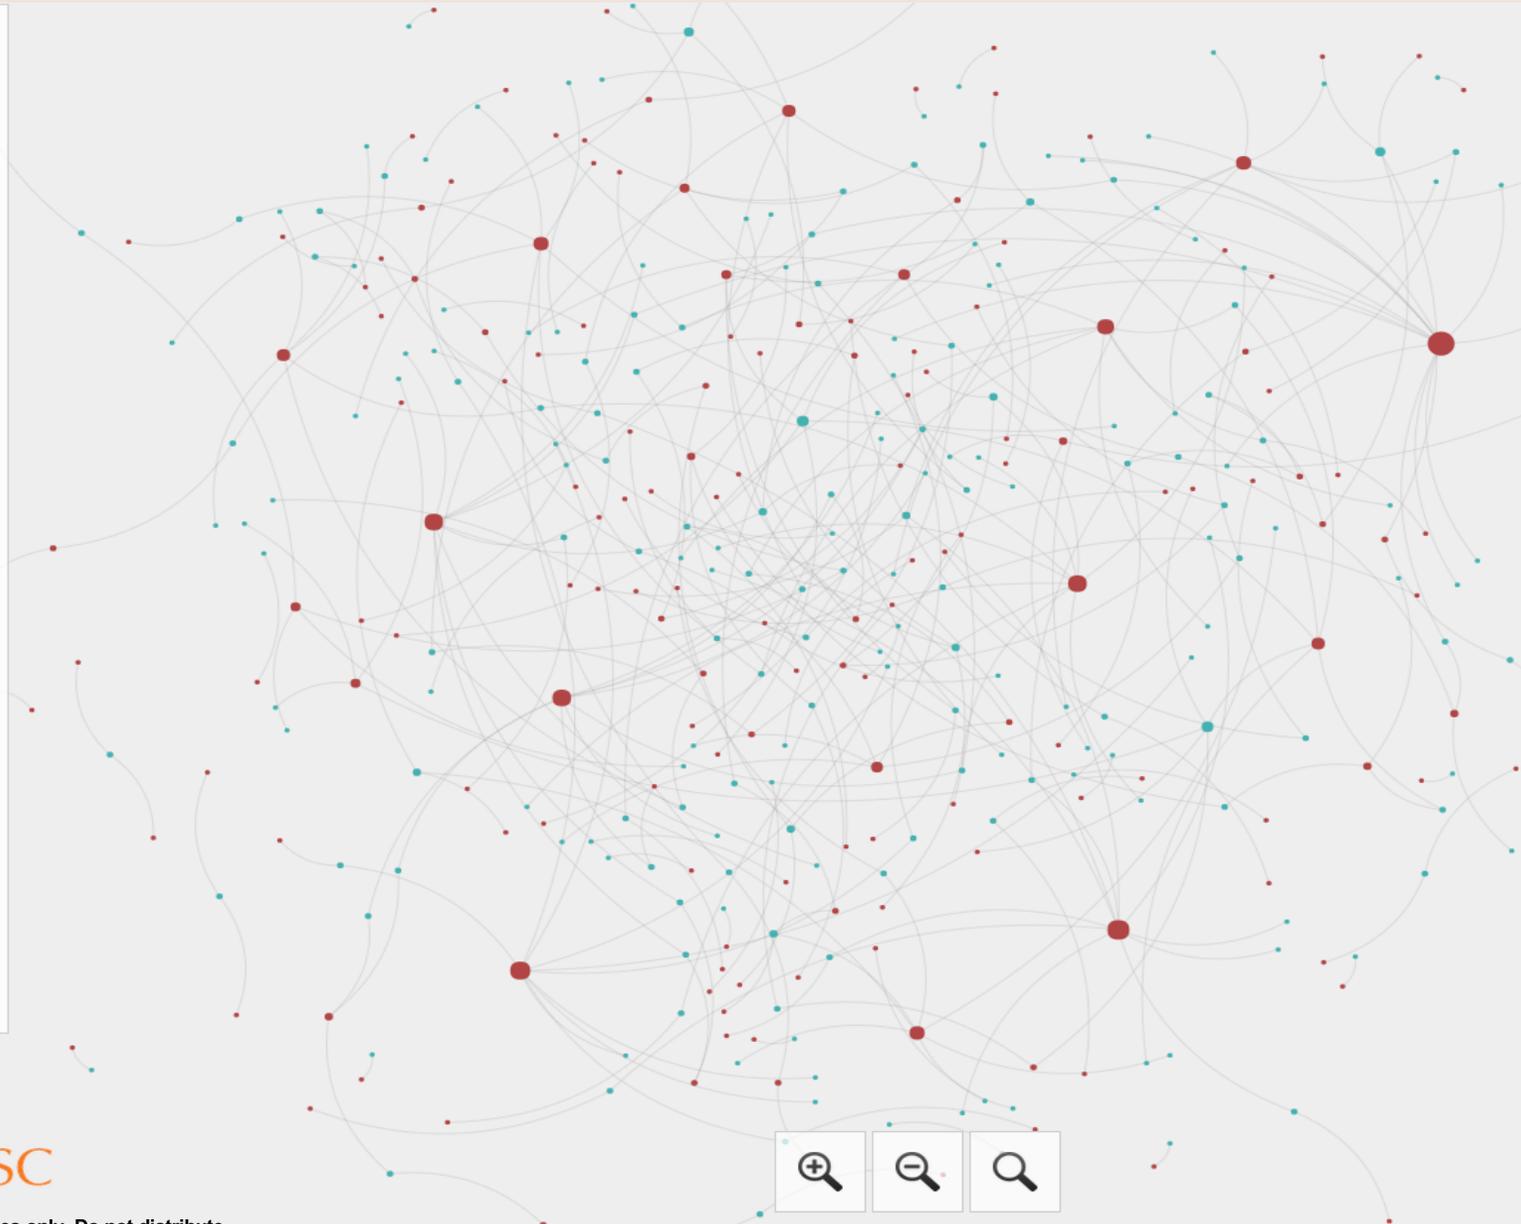

-  student_of/apprentice of
-  occurrences Count
-  teachers
-  students

How ?

- 1st step: In SPARQLEndpoint at vocab.getty.edu, use a query like this [example](#) and download json.
- 2nd step: insert the json file in OpenRefine and extract data (nationality, date, etc.) using split function and regex if needed.
- 3rd step: Export csv data with comma-separated value and use [table2net](#) to create a .gexf file (use bipartite Network).
- 4th step: Open .gexf file in [Gephi](#) and play with classement and partition to adjust edges before using Force atlas 2 as spatialisation.
- 5nd step: In the preview, change the settings as you like
- 6nd step: After downloading the plugin sigma.js, export your project and put it on a local server to try.

This example is based on requests by Vladimir Alexiev, available on the Getty's website. Thanks.

The Future of the Getty Vocabularies LOD

- Current effort underway at the Getty to bring together all institutional data sets under one semantic architecture online
- ULAN data model / ontology first to be changed with standards such as CIDOC-CRM and Schema.org being evaluated
- AAT ontology definition will likely not change significantly
- TGN ontology definition will most likely change, but options have yet to be evaluated
- Focus will shift to providing the data in forms that are easier to understand and use, and services for both humans and machines on top of the data to help with discovery and reconciliation

API: Application Programming Interface

The same data can be exposed in different ways to different audiences simultaneously.

- Need to understand how to access the data
- APIs can provide different functionality
- Fewer ways with more users is more sustainable
- Web provides HTTP protocol for data transport

Data Profiles

Need the shape of the data to be consistent and easy to use.
Different audiences thus need different shapes.

- Current profile (SKOS-XL, custom GVP) for Researchers
- Add Linked Art profile for Museum audience
- Add schema.org profile for Web/SEO Audience

Different representations or descriptions of the
same entity, not different entities.

Developer-Friendly Format

```
{
  "@context": "https://lod.museum/ns/context/1/full.jsonld",
  "id": "https://lod.museum/example/object/1",
  "type": "ManMadeObject",
  "classified_as": "aat:300033618", # by reference
  "label": "Example Painting",
  "made_of": {
    "id": "aat:300015045", # by (minimal) value
    "type": "Material",
    "label": "watercolor"
  }
}
```

Applications

Developers that can rely on consistent format, shape and interactions, can build robust and innovative applications.

- Need many such applications to validate usability
- Notifications of updates to remain synchronized
- Notifications of contributions to dataset
 - ... via reference to external entities?

Translations provide easy internationalization

Contributing to the Getty Vocabularies

- Contact Getty Vocabulary Program and sign contributor agreement
- Input format is XML, but other formats are considered
- Required fields for each Vocabulary
- Custom merging algorithms combine data for concepts/people/places that already exist in data set

<http://www.getty.edu/research/tools/vocabularies/contribute.html>

Future Challenges for Community Integration

- Data synchronization between Vocabularies and contributors
- Timely notifications of updates to user community
- New approach to data loads in order to simplify and speed up contributions
- Co-referencing of data repositories that aligned with the Vocabularies

Thank you!
