

The Common Catalogue of Data Fields for Prints and Drawings

A Guide to High-Quality LIDO Data

Angela Kailus

ICOM-CIDOC Annual Conference, Milan 3 July 2016, LIDO Working Group

Why LIDO Application Profiles?

LIDO 1.0:

- Provides generic format to incorporate a wide scope of different types of cultural heritage objects
- Only two descriptive mandatory metadata elements (objectWorkType, title)
- XML-schema provides no further validation of use of elements or vocabulary
- Aim: low formal barrier to use LIDO in a large variety of collections

Why LIDO Application Profiles?

Inclusion of more specific levels of object types or art genre

- conventions and shared understanding on core information about an object
- LIDO could support improved consistency of data content for different application fields: declaration of core elements and attributes according to genre or type
- Recommendations for optional elements
- LIDO Application profiles: to be developed with expert community

Why LIDO Application Profiles?

Objectives

- Ingest semantic richness and detail from original indexing into harvesting format
- Improve data quality for indexing and display of data in publication contexts
- Support cataloguing :
 - Specify core fields and handling of optional fields from publication viewpoint
 - Recommendations for use of controlled vocabulary and authority data

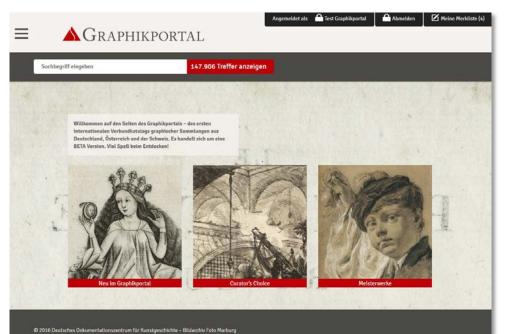

Expert Community: *Arbeitskreis Graphik vernetzt*

- 52 museums and library collections of prints and drawings from Germany, Austria,
 Switzerland and the Netherlands. Active participants in LIDO work:
 - Amsterdam, Rijksmuseum
 - Basel, Kunstmuseum, Kupferstichkabinett
 - Bern, Kunstmuseum Bern, Graphische Sammlung
 - Braunschweig, Herzog Anton Ulrich-Museum, Kupferstichkabinett
 - Bremen, Kunsthalle
 - Cologne, Wallraf-Richartz-Museum Fondation Corboud
 - Dresden, Staatliche Kunstsammlungen Dresden, Kupferstichkabinett
 - Frankfurt/Main, Goethe-Haus Frankfurt Freies Deutsches Hochstift
 - Frankfurt/Main, Städel Museum, Graphische Sammlung
 - Geneva, Musées d'Art et d'Histoire de Genève, Cabinet des Estampes
 - Hamburg, Kunsthalle, Kupferstichkabinett
 - Heidelberg, Universitätsbibliothek, Graphische Sammlung
 - Marburg, Deutsches Dokumentationszentrum für Kunstgeschichte Bildarchiv Foto Marburg
 - Nuremberg, Germanisches Nationalmuseum
 - Rome, Bibliotheca Hertziana Max-Planck Institut für Kunstgeschichte
 - Vienna, Albertina
 - Vienna, Österreichisches Museum für Angewandte Kunst
 - Wolfenbüttel, Herzog August Bibliothek
 - Zürich, ETH, Graphische Sammlung
 - Zürich, Universitätsbibliothek

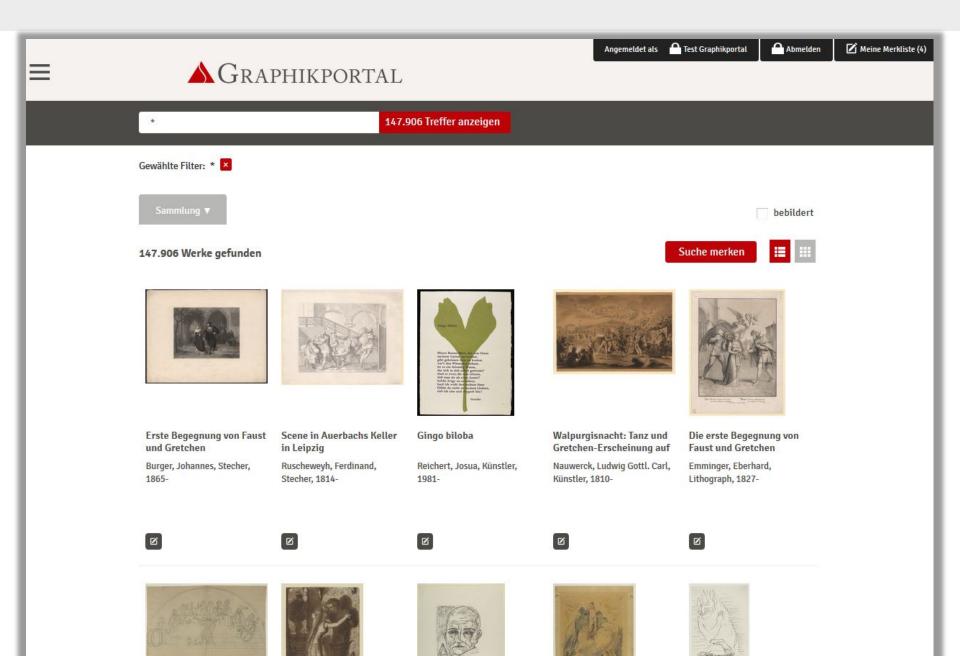

Expert Community: Arbeitskreis Graphik vernetzt

Aims

- to promote standards for the digitization and indexing of works on paper (except photography)
- map out strategies to encourage digital integration of collections
- Graphikportal as a new union catalogue of prints and drawings (launch in 2017)
 - LIDO as joint ingest format, to be delivered by the collections
 - Presenting detailed data to an expert community

Expert Community: Graphikportal Prototype

Expert Community: Graphikportal Prototype

Erste Begegnung von Faust und Gretchen

Objektbezeichnung Druck

Gattung Druckgraphik

Entstehung Burger, Johannes Stückelberg, Ernst

> 1865-Radierung

Maße Höhe x Breite: 32,1 x 41,3 cm (Darstellung)

Höhe x Breite: 40,8 x 46,5 cm (Platte)

Höhe x Breite: 58,2 x 74,8 cm (Blatt)

Höhe x Breite: 70,0 x 100,0 cm (Passepartout)

Inschrift Bezeichnung auf dem Objekt — Rechts im Bild auf der Treppenstufe radiert "E.

> STUECKELBERG FEC. MDCCCIXV", darunter links "E. Stückelberg pinx.", wiederum rechts "J. Burger sc.", zentriert "Druck v. Fr. Felsing, München" "Faust." "Vervielfältigung vorbehalten." "Deposé." "Entered at Stationers Hall." "FRIEDRICH BRUCKMANN'S VERLAG IN MÜNCHEN. /

BERLIN, WIEN, PARIS, LONDON, NEW-YORK."

Sammlung

Frankfurt/Main, Frankfurter Goethe-Haus / Freies Deutsches Hochstift

(Frankfurt/Main), III-03465

Ikonographie: 82 AA (Gretchen) * Gretchen Themen

Ikonographie: 82 A (Faust) * Faust

Ikonographie: 82 A (Mephisto) * männliche literarische Charaktere (Mephisto)

Ikonographie: Drama

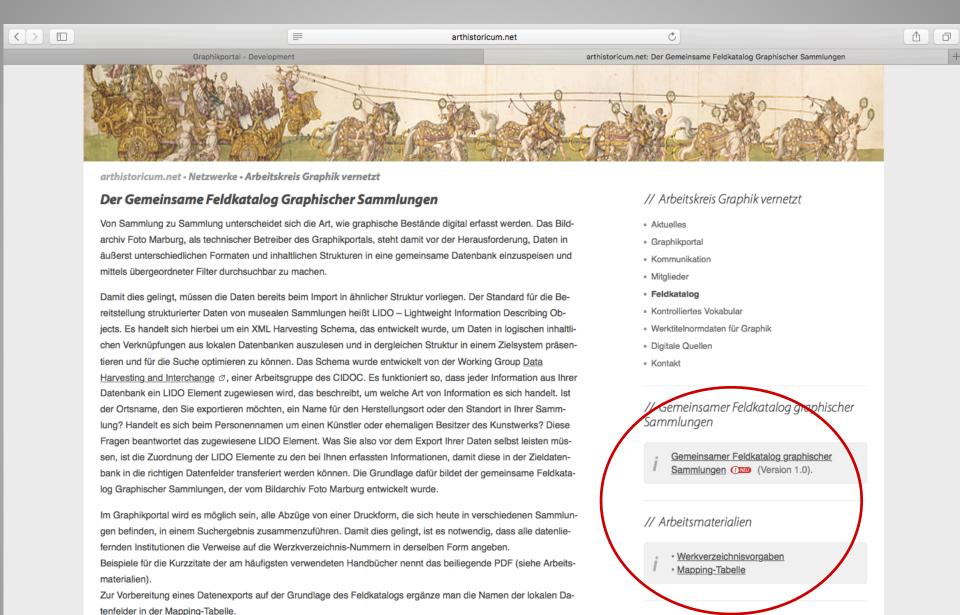

Beschreibung Illustration zu Faust I, Verse 2605ff.: Blick auf eine bildhohe Kirchenfassade

> mit zweibogiger Vorhalle, darin links Ausblick auf Kreuzgang und Landschaft; rechts der über Stufen liegende Eingang zur Kirche, aus dem zahlreiches Volk strömt. Im Vordergrund mittig Faust und Gretchen, beide in "altdeutscher" Tracht; er zwei Stufen herab auf sie zustrebend und die Hand ausstreckend, sie kokett zurückweichend gemäß Text. Rechts dahinter auf einer Steinbank Mephisto als Beobachter. Textreue, doch phantasievolle Darstellung im Geiste

von Kaulbach; sehr guter, farbsatter Abdruck.

The Common Catalogue of Data Fields: Contexts of Use

Museum curators, cataloguers, IT specialists work on

- (Re-)Design of field catalogs or cataloguing rules for local documentation systems
- Good practice guidance for cataloguing
- Mapping of local data to LIDO

- Publication of interoperable rich metadata from different sources
- Comprehensive and exact search results

The Common Catalogue of Data Fields as an Application Profile

Addresses the general and specific aspects of indexing graphic art works:

- Discusses how to evaluate and structure existing information for cataloguing
 - Recommends how to record specific information crucial to the art formRelated works
 - Inscriptions and marks
 - Production events: creation, printing, publishing, questions of attribution
 - Provenance
 - Exhibitions
 - Secondary literature
- Contents arrangement from art-historical point of view, within a LIDO grid
- Defines core information fields
- Recommends use of published authority data
- Provides reference on how to generate quality LIDO export data from the local data thus created

Plattenzustand (empfohlen)

Definition: Eine Beschreibung des Bearbeitungszustands des für den Abzug

verwendeten Druckträgers

Tipps für die Erfassung:

Die Angabe des Plattenzustands folgt der Logik des jeweiligen Werkverzeichnisses, auf das referenziert wird, es ist also eine Angabe von Buchstaben, römischen oder arabischen Zahlen.

 Immer den Hinweis auf die Gesamtanzahl möglicher Druckzustände, wenn bekannt, mit aufführen, also II von III.

 Wenn die Gesamtanzahl der Zustände unbekannt ist, dann diese Angabe weglassen und nur den bekannten Zustand nennen.

 Ebenso sind hier Freitextangaben wie Probedruck, Abzug vor aller Schrift etc. möglich.

· Deutlich darauf hinweisen, wenn die Experten sich uneinig oder unsicher sind bezüglich der Unterscheidung der Druckzustände, z.B. möglicherweise der 3. von 4 Zuständen

 In diesem Feld auf eine stets gleichlautende Schreibregel achten, je normierter hier die Angaben sind, desto eher ist es möglich, bei

späteren Recherchen nach Zuständen zu filtern.

Verweise:

Die Quelle, auf die sich die Angabe des Druckzustands bezieht, im Feld "Werkverzeichnis + Nr." und / oder "Werktitelnormdatensatz-

ID" angeben.

45

3. Block: Objektidentifikation

Beispiele: I (II) oder I von III oder Probedruck

LIDO-Export

LIDO Element: Display State

Tipps für den LIDOlido:displayState ist ein Kindelement von lido:descriptiveMetadata/ lido:objectIdentificationWrap/lido:displayStateEditionWrap.

Export:

Prints: A Multitude of Relationships

Prints: Pictorial works produced by transferring images by means of a matrix such as a plate, block, or screen, using any of various printing processes (AAT)

- Many prints from one printing plate (multiples)
- Print can be produced from different states of the printing plate: preliminary states of the visual work or later changes on an already completed status
- Print can be part of a book, which can be republished in various (modified) editions
- Print can be published in various books, in new contexts
- Print can be made part of a portfolio or series, or of several of these
- Print relates to drawing deliberately produced for transferring the motive to the printing plate
- Print reproduces other two-dimensional works (paintings, drawings, other prints)

Printed works: intrinsic relations in FRBRoo model

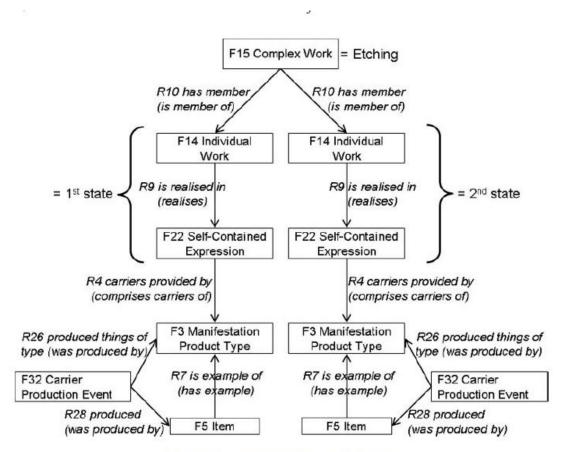

FIGURE 4 Art Prints With Several States.

Printed works: intrinsic relations in FRBRoo model

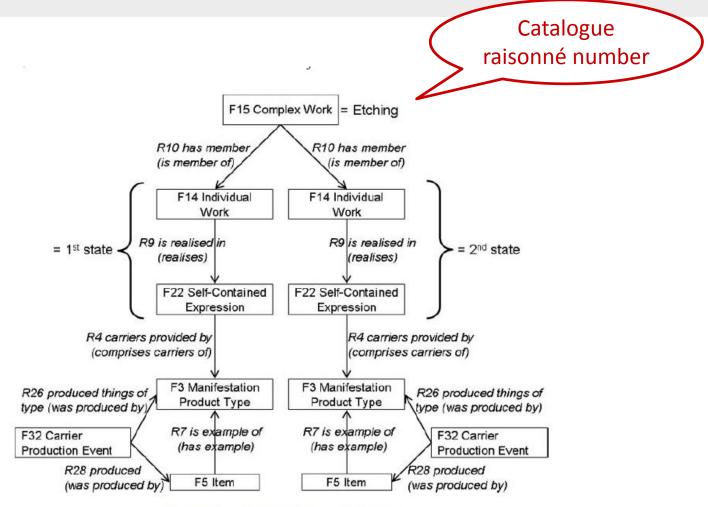

FIGURE 4 Art Prints With Several States.

Related Work Relationship Types: FRBRoo Properties

- relatedWorkRelType/conceptID = 'R3i_realises': reference to Catalogue raisonnè number of the print
- relatedWorkRelType/conceptID = 'P106i_forms_part_of'': reference to Catalogue raisonné number of the series of prints
- relatedWorkRelType/conceptID = 'P46i_forms_part_of': reference to the physical object the print is part of (a series of prints; a book; a portfolio)

Other Related Work Relationship Types

Nonhierarchical relations

- Recto
- Verso
- Pendant zu (counterpart to)

Relations between a preparatory and a completed work

- Studie für (is study for) hat Studie (has study)
- Modell für (is model for) hat Modell (has model)
- Plan f
 ür (is plan for) Plan von (plan of)
- vorbereitend für (peparatory for) basiert auf (based on)
- Abklatsch von (counterproof of) hat Abklatsch (has counterproof)
- Druckform für (printing plate for) Abzug von (impression from)

Relations between replicas and their source

- Kopie von (copy of) hat Kopie (has copy)
- Faksimile von hat Faksimile
- Reproduktion von (is a reproduction) hat Reproduktion (has a reproduction)
- Zitat nach zitiert in
- Nachahmung von (is an imitation) Vorbild für (has an imitation)

Unspecified relations

hat Bezug zu (related to)

Prints: Major Events

Several stages of production, expressed as FRBRoo classes

- Work Conception (F27) invented by, drawn by, after ("invenit", "delineavit")
- Expression Creation (F28) realization of the concept in a certain form; production and modification printing plate – engraver, etcher, author, producer ("incisit", "fecit")
- Publication Event (F30) realization of all editorial decisions editor ("excudit")
- Carrier Production (F32) production of prints printer ("impressit")

All of these can

- ➤ Have different actors in various roles, with differing degrees of attribution
- Have different dates and places
- ➤ Have different techniques and materials
- Be performed repeatedly (except Work Conception)

The Common Catalogue of Data Fields: Core Information Fields

LIDO mandatory elements:

- Record type, object work type, title
- Record ID, record type, record source
- Language attribute (administrative/descriptive metadata)

When available, give information on:

- Production and publication events: actors, roles and attribution, actor life dates, Actor authority IDs;
 event dates; materials and techniques applied;
 unknown creator: school/style
- Measurements
- Catalogue raisonné number
- Current collection, place name, inventory number
- Image name/image URL
- Credit line work copyrights, image copyrights, metadata copyrights
- Accessibility of provided digital image (display? download?)

The Common Catalogue of Data Fields: Recommended Fields

Preferably also give information on:

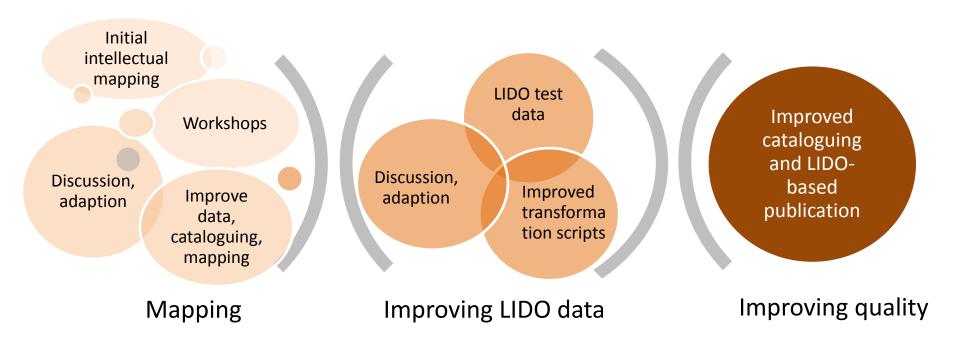

- Genre, art form
- Type of title
- Printing state
- Number of copies
- Object description, with name of author
- Iconography, subject represented
- related object: related work relation type, identifier, description
- Provenance
- Watermarks, collector's stamps: inventory reference number, place of application, description
- Inscriptions: place of application, description, transcription
- Backlink into museum's web database (record info link)
- Work rights, image rights, metadata rights: rights type, rights holder, credit line

Recommended Use of Published Authority Data

Entity	authority	authority	authority
Classification	AAT	GND	
Object Work Types	AAT	GND	
Materials	AAT		
Techniques	AAT
